

HostV Marks Thanksgiving by Doubling Disk Space for Virtual Private Servers

NEW YORK (November 25, 2009) – [HostV](#), a leader in managed Virtual Private Servers and Dedicated servers, is offering its own Thanksgiving gift: the company announced today it will double disk space and backup space on all of its hosting plans. The upgrade will include both new and existing customers, regardless of sign-up date.

“Our goal is simple—do everything possible to improve customer satisfaction and stay competitive. Given that Thanksgiving is the unofficial start of the holiday gift-giving season, we thought this would be an excellent opportunity to give back to our loyal customers and add value to our line of hosting services,” said John Xie, president of Cirtex Corp., HostV parent company.

HostV will double both disk space and backup space without raising prices. It plans to complete all disk space upgrades by the end of the month, and introduce several other significant service upgrades, including an enterprise backup solution, before the end of the year. Additional details will be released as they become available.

The company provides a variety of Virtual Private Server (VPS) hosting solutions. [VPS Hosting](#) from HostV starts at \$39.99/monthly for 50GB of disk space and 1000GB of top-tier data transfer. All accounts include full support for video hosting, free data backups, and HostV’s premium customer support.

Starting at just \$149.99 per month for 300GB of RAID-10 protected disk space and 5000GB of monthly data transfer, HostV’s [Hybrid Servers](#) include 24/7 premium technical support and access to data backup space that offers a full mirror of each plan’s disk space allotment. All Hybrid Servers are based on Linux and offer pre-installed server management software, including Parallels Virtuozzo Power Panel, cPanel and Fantastico. Clients also receive SSH root access to their servers.
