

## **CirtexHosting Adds Support For PostgreSQL Databases in cPanel**

**NEW YORK, December 14, 2009** – [CirtexHosting](#), a leader in Linux Web hosting, announced today it has added [PostgreSQL Hosting](#), enabling its customers to create and manage PostgreSQL databases through the cPanel control panel.

The vast majority of shared Web hosts currently do not support PostgreSQL, instead supporting only the MySQL database platform. Although both platforms are loaded with an impressive array of features and boast strong performance records, CirtexHosting added support for PostgreSQL to allow its customers to utilize the database the best meets their needs.

“In recent months, there has been a consistent increase in demand from our customers for more database options. Although supporting two databases increases the complexity of our hosting environment and adds marginally to our customer support load, we believe it is essential to do everything we can do help our customers succeed, especially when they ask for improvement in a specific area,” said CirtexHosting President John Xie.

Customers can utilize either MySQL or PostgreSQL at no additional charge. In fact, customers are able to manage both MySQL and PostgreSQL databases when creating databases in their allotment. This flexibility enables customers to build a Web site that relies on a diverse set of applications that are powered by both platforms.

CirtexHosting offers a variety of [Unmetered Bandwidth hosting](#) plans and Semi-Dedicated hosting plans, in addition to Shared hosting and Reseller hosting plans. With Unmetered Bandwidth Hosting, customers can host bandwidth-intensive applications and stream multimedia without worrying about exceeding arbitrary caps or facing crippling overage fees. Unmetered Bandwidth hosting plans start at just \$15.99 per month. Semi-Dedicated hosting plans start at just \$35.99 per month and are housed on powerful servers that can deliver the level of system resources needed to sustain optimal performance for each individual account.
