

*Summary: CirtexHosting today celebrates its six year anniversary, marking an important milestone for the shared web hosting firm with thousands of small business and individual clients around the world.*

## **FOR IMMEDIATE RELEASE**

### **CirtexHosting Celebrates Six Year Anniversary**

**NEW YORK, March 4, 2009** – CirtexHosting (<http://www.cirtexhosting.com>), a leading provider of shared and reseller Multiple Domain Linux web hosting solutions, today celebrates its six year anniversary of hosting thousands of individuals and small businesses around the world.

Launched in March 2003, CirtexHosting has weathered dramatic changes to the hosting marketplace and generated steady revenue growth in each of its operating years. It now offers five shared hosting plans, three reseller hosting options, and a variety of other premium services, including dedicated servers, virtual dedicated servers, and web development. When the company was started, it offered just a few shared hosting choices.

In the last year alone, its parent company Cirtex Corp. launched HostV (<http://www.hostv.com>) to provide business-class Virtual Private Servers. HostV's instant success has further fueled the company's broad momentum.

“As I look back six years, it's astounding and humbling to see how far we have come, but also how far we still have to go. In six years, we have seen our competitors come and go, and the needs of our clients change dramatically. It is reassuring to know we are among the few stable actors that have led the industry through both the tumultuous and prosperous times, and I sense our resilience will remain an asset in the next few years especially,” said CirtexHosting President John Xie.

In the coming months, as CirtexHosting marks its sixth year, it will begin to roll out a series of internal and external upgrades. The company is investing in infrastructure upgrades in its data center facility and has focused resources on professional development for its staff. Service upgrades, including greater resource allotments and new value-added features, will also be deployed.

CirtexHosting will also place a greater focus on forming new partnerships and sponsorships that increase customer loyalty and generate revenue. Past partnerships have primarily worked to boost the company's video streaming and multimedia management services, and this theme is likely to continue in 2009.

“In six years, we've always had our eye on one prize—keeping our customers happy. That's never going to change, and it will undoubtedly keep us in business for another six,” said Xie.

New customers can take advantage of a special discount on all hosting plans through the end of March in celebration of the anniversary. CirtexHosting is offering 77% the first invoice for any order (including yearly orders) with coupon code ANV09.
