

Cirtex Corp. Releases Webmaster Tools Application for Apple iPhone, iPad

NEW YORK, May 17, 2010 – Cirtex Corp., parent company of hosting leaders [CirtexHosting](#), [HostV](#), and soon to be launched [JENKU](#), today released its new Cirtex Webmaster Tools application for the iPhone, iPod touch, and iPad, providing webmasters worldwide with core website management functionality on their mobile device.

The new application, which is available free of charge from the Apple iTunes Store, allows users to perform a wide-range of tests and checks, including domain WHOIS lookups, DNS lookups, Reverse DNS lookups, Ping and Latency checks, Tracerout searches, and more. Users can also perform specific searches on domain name related data, including Alexa rankings and DMOZ listings.

Existing customers of [CirtexHosting](#), [HostV](#) and [JENKU](#) can also use the application to directly access the billing center, enabling them to pay their hosting bill and manage their account. Customers can also contact support staff and access a community forum to interact with other hosting users.

“There has been a seismic shift in the past several years in the way mainstream hosting users interact with the Web. Internet-enabled mobile devices are becoming the new norm in managing and maintaining websites, and we feel now is the right time to make the leap to the mobile world. Our webmaster tools application provides a broad assortment of functionality for our customers, and the feedback we received so far has been overwhelmingly positive,” said Cirtex Corp. President John Xie.

[Unlimited bandwidth Shared Web hosting](#) from CirtexHosting starts at \$2.99 per month for 5000 MB of disk space, Colortex cPanel, and a wide variety of other value-added features. Reseller hosting starts at \$25.99 per month for 25GB of disk space, and Semi-dedicated hosting starts at \$35.99 per month for 20GB of disk space.
