

Summary: Cirtex Corp. today released its new Cirtex Webmaster Tools application for the Android OS, providing webmasters worldwide with core website management functionality on their mobile device.

Cirtex Corp. Releases Android OS Mobile Webmaster Tools Application

NEW YORK, June 29, 2010 – Cirtex Corp., parent company of hosting leaders [CirtexHosting](#), [HostV](#), and soon to be launched [JENKU](#), today released its Cirtex Webmaster Tools application for Android, the Google-sponsored open-source operating system for mobile phones. Today's announcement follows the release of a similar application for Apple's iPhone.

The new Android application, which is available free of charge, allows users to perform a wide-range of tests and checks, including DNS lookups, Reverse DNS lookups, WHOIS lookups, Ping and Latency checks, Tracerout searches, and more. Users are also able to access domain name related data, including Alexa rankings and DMOZ listings.

“Our customers have consistently asked us to provide more support resources for mobile devices. After releasing our iPhone application in May, we received a tremendous, unexpected response, and we decided it was important to offer the Webmaster Tools application on even more platforms. Android is a fast-growing, open-source mobile platform that requires our serious attention when evaluating the mobile OS market,” said Cirtex Corp. President John Xie.

Existing customers of [CirtexHosting](#), [HostV](#) and [JENKU](#) can also use the application to directly access the billing center, enabling them to pay their hosting bill and manage their account. Customers can also contact support staff and access a community forum to interact with other hosting users.

[Unlimited bandwidth Shared Web hosting](#) from CirtexHosting starts at \$2.99 per month for 5000 MB of disk space, Colortex cPanel, and a wide variety of other value-added features. Reseller hosting starts at \$25.99 per month for 25GB of disk space, and Semi-dedicated hosting starts at \$35.99 per month for 20GB of disk space.
