

HostV Introduces Fully Managed Hybrid Servers

NEW YORK (July 28, 2009) – [HostV](#), a leader in Virtual Private Servers and Dedicated servers, today introduced [Hybrid Servers](#), providing the power and scalability of enterprise-class servers at a price small businesses can afford.

Starting at just \$149.99 per month for 150GB of RAID-10 protected disk space and 5000GB of monthly data transfer, [Hybrid Servers](#) include 24/7 premium technical support and access to data backup space that offers a full mirror of each plan's disk space allotment. All Hybrid Servers are based on Linux and offer pre-installed server management software, including Parallels Virtuozzo Power Panel, cPanel and Fantastico. Clients also receive SSH root access to their servers.

“Hybrid Servers are an important addition to our line of hosting services. By creating a new alternative for clients looking for the benefits of virtualization with the power and capability of dedicated server hardware, we are able to better meet client needs and serve additional segments of the market,” said John Xie, president of Cirtex Corp., HostV parent company. “Hybrid Servers have been carefully built to provide concentrated system resources and redundancy in so many areas. These characteristics are vital to our clients, and are especially attractive alongside our competitive pricing structure.”

HostV also provides a variety of Virtual Private Server (VPS) hosting solutions. [VPS Hosting](#) from HostV start at \$39.99/monthly for 25GB of disk space and 1000GB of top-tier data transfer. All accounts include full support for video hosting, free data backups, and HostV's premium customer support.
