

Summary: Cirtex Corp announced today launch of Video Script Installer™ (VSI), an exclusive feature that allows users on Shared hosting, Reseller Hosting, Virtual Dedicated Servers and Dedicated Servers to easily add video sharing scripts to their Web site in just a few clicks. The company will offer VSI to customers on its two flagship hosting brands, CirtexHosting and HostV.

Cirtex Corp. Unveils Exclusive Video Script Installer™ (VSI) As Value-Added Feature for CirtexHosting, HostV Customers

NEW YORK (August 26, 2008) – Cirtex Corp. (<http://www.cirtex.com>) announced today launch of Video Script Installer™ (VSI), a value-added, exclusive feature that allows users of Shared hosting and Virtual Dedicated Servers to easily add video sharing scripts to their Web site in just a few clicks. The company will offer VSI to customers on its two flagship hosting brands, CirtexHosting (<http://www.cirtexhosting.com>) and HostV (<http://www.hostv.com>).

Available only from Cirtex Corp, Video Script Installer™ (www.cirtexhosting.com/video-script-installer.shtml) is accessible through an intuitive interface within each client's Web site control panel. The interface allows one-click installation of ClipBucket, VidiScript, and PHPmotion. Each of the scripts allows hosting users to build Web sites with similar usability as Google's popular video sharing site, YouTube. Cirtex Corp. is also making available RED5 and FFmpeg –server side video processing engines – to power the three VSI scripts.

“For the past several years, we have seen the real value and growth in online video and we have made a series of moves to help secure our spot as a leader in the video hosting market. With today's launch of Video Script Installer™ we continue our commitment to offering our customers the tools they need to succeed and compete as the Web continues to evolve,” said John Xie, President of Cirtex Corp. “VSI enables our customers to setup a fully-functional, automated video sharing portal in less than three minutes.”

The company recently forged exclusive partnerships with both VidiScript and ClipBucket to offer their scripts to Web hosting customers. Cirtex Corp. clients are able to take advantage of VSI as a value-added feature at no additional charge.
